**U.S. Government Standard General Ledger
Account Transactions**

This section provides accounting transactions for events occurring throughout the Federal Government. The transactions illustrate both proprietary and budgetary entries for each accounting event. Transactions are grouped under the following categories:

A 100-799	Funding Sources
B 100-699	Disbursements and Payables
C 100-799	Collections and Receivables
D 100-799	Adjustments/Write-offs/Reclassifications
E 100-799	Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections
F 100-499	Yearend
G 100-299	Memorandum Entries
H 100-799	Other Specialized Transaction Entries

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the Federal Government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.

For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:

- o Unexpended appropriations from general fund resources not earmarked by law for a specific purpose - USSGL account 310300, "Unexpended Appropriations - Transfers-Out," or
- o Financing sources that impact cumulative results of operations - USSGL account 576500, "Nonexpenditure Financing Sources – Transfers-Out."

The "Transfer To" entity must use a proprietary USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 310200, "Unexpended Appropriations - Transfers-In" corresponds to USSGL account 310300. USSGL account 575500, "Nonexpenditure Financing Sources – Transfers-In" corresponds to USSGL account 576500. Failure of both entities to record the matching proprietary USSGL account category (310200/310300 or 575500/576500) will result in agency-wide and/or Government-wide elimination discrepancies.

There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:

- o Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and

SUPPLEMENT

Section III

- o Financing sources, such as Economy Act revenue, that impact cumulative results of operations.

To facilitate reconciliation of interagency expenses and revenues, do not post cost directly to “in-process type” asset accounts. Agencies must first record cost, such as direct labor (payroll and benefits) and direct materials that do not meet agency established capitalization thresholds, in the appropriate USSGL account 600000 series expense account. Use USSGL account 661000, “Cost Capitalization Offset” to apply the cost to the desired “in-process type” asset account. Do not record amounts applied to asset accounts under this method to USSGL account 88XXXX series accounts.

The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency’s accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency’s activities. Agencies must post transactions using the 6-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 6-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 6-digit base account is the same.

Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.

All transactions apply to activity with Federal and non-Federal entities unless limited by account definition or otherwise noted in the transaction description.

A USSGL transaction crosswalk can be obtained at the TFM website (<http://tfm.fiscal.treasury.gov/v1/supplements/ussgl.html>).

The transaction reference provides an example of where this transaction appears. It may not provide all possible USSGL implementation guidance that contains this transaction.

Comment: Prior to maturity, an entry is made to complete the amortization of a discount. The budgetary entry shows the purchase discount is realized as a budgetary resource when the security matures. Special and trust funds use USSGL account 411400. Also post USSGL TC-A122 if authority was previously anticipated and apportioned or USSGL TCA123 if authority was previously anticipated in programs exempt from apportionment. Fiduciary deposit funds would not record the budgetary entry. See USSGL TC-A195, TC-C109, or TC-C140 to record the collection of interest received on the maturity. See USSGL TC-C128 to record the maturity of a U.S. Treasury Zero Coupon Bond issued by the Bureau of the Fiscal Service. C430 To record an old motor vehicle that was traded in for a new motor vehicle using the direct method.

Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle.

Due to the reconciliation of interagency expenses and revenues, agencies must first record all direct costs to a USSGL account 600000 expense series account and then offset those amounts using the USSGL account 661000 when the costs are capitalized to the appropriate "in-process type" account.
