

U.S. Government Standard General Ledger USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 4-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 4-digit accounts plus attributes. This section provides USSGL attribute tables for both proprietary and budgetary USSGL accounts and attributes reported to the the FMS-administered FACTS I and FACTS II "trial-balance" reporting systems.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For FACTS II reporting, USSGL accounts 4871, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries," 4872, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected," 4971, "Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries," and 4972, "Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected," do not need the reimbursable flag attribute with the domain values of direct and reimbursable. However, at yearend these accounts close to USSGL accounts 4801, "Undelivered Orders – Obligations, Unpaid," 4802, "Undelivered Orders – Obligations, Prepaid/Advanced," 4901, "Delivered Orders – Obligations, Unpaid," and 4902, "Delivered Orders – Obligations, Paid," that do require the reimbursable flag attribute for FACTS II reporting. Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

Attributes Used To Prepare the Financial Report of the United States Government

USSGL attributes are one component of detailed data in agencies' financial systems related to the external reporting of financial statements. The USSGL proprietary account data table shows the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Office of Management and Budget (OMB) Form and Content Agency Financial Reports

The USSGL proprietary attribute data table also shows the USSGL account attributes necessary to produce agency financial statements required by OMB. Refer to Section V: Crosswalks to Standard External Reports.

Attribute Definition Report

This report provides definitions for the attributes associated with each proprietary USSGL account for reporting. Agencies are required to report their adjusted trial balances and selected NOTES amounts in FACTS I with attributes described in the detailed financial information.

USSGL Proprietary Accounts and Attributes

The USSGL proprietary accounts table provides USSGL accounts, account titles, normal balance indicators, and associated attributes for USSGL accounts that agencies will use for reporting; these columns contain one of two values:

Space	Attributes are not required for the USSGL account.
Y	This domain value indicates that the attribute is required when this USSGL account is reported. A list of the valid domain values for each attribute is provided on the last page of the attribute table.

The FACTS I team may update between USSGL TFM releases. For the latest information, access the GFRS/FACTS I Web site at www.fms.treas.gov/factsi/index.html.

Fiscal 2010 Attributes Used To Prepare Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agencies' financial systems (for example, USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's Budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report/Appendix. The data model includes:

- ◆ FACTS II Attribute Definition Report;
- ◆ FACTS II USSGL Account Attributes Table.

FACTS II Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

FACTS II USSGL Account Attribute Tables

The FACTS II attribute table for fiscal 2010 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

Space	This attribute is not reported in FACTS II for the USSGL account.
Y	Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the "FACTS II - Attribute Definition Report" in this section.

For the latest information, access the FACTS II Web site at www.fms.treas.gov/factsii/index.html.
