

Enable Transport Layer Security (TLS)

To enable TLS 1.2, complete the following steps:

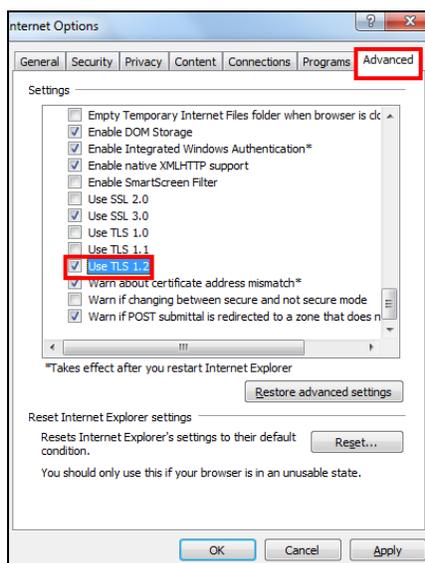

1. Click the **Internet Explorer** to open the web-browser.

2. Click **Tools** and click **Internet Options**. The **Internet Options** dialog box appears.

3. Click the **Advanced** tab, and scroll down to **Security** until **Use TLS 1.2** appears. Click **Use TLS 1.2**.

4. Click **Apply** and then click **Ok** to enable the new setting.
